OBJECTIVE

I intend to work in a challenging environment where I get opportunity to learn and develop my knowledge, skills and make best use of it for the growth of Organization and establishing myself.

PROFESSIONAL SUMMARY

- **MuleSoft Certified Developer** - Level 1 (Mule 4).
- Over 5.4 years of experience in IT which includes **3 years** of experience in software development with key focus on designing, development, testing and deployment of API's using **MuleSoft**.
- Good Experience in **Software Development Life Cycle (SDLC)** including Requirement Analysis, Development, Testing and Deployments (CI/CD) of software applications.
- Hands-On experience in MuleSoft, **Mule ESB 4.x** with **Anypoint studio 7**.
- Understanding of **REST and SOAP Web Services**.
- Experience in developing enterprise application in **API-LED connectivity** design using System, Process and Experience layers.
- Experience in developing and implementing **RAML** based APIs using Anypoint platform.
- Good Hands-On Experience on **DataWeave** and Mule Connectors.
- Experience in various Mule Connectors such as **HTTP, DB, AnypointMQ** and **Salesforce**.
- Worked on message formats like **XML, JSON** formats.
- Experience in writing **MUnit** test cases to validate Mule flows.
- Project build and management using **Maven**.
- Source control management using **GitHub**.

- Experience in working with **CloudHub** integration, deploying and managing applications in CloudHub.
- Experience in working in **Agile/scrum methodologies**.

TECHNICAL SKILLS

Tools	:	Anypoint Studio, Mule ESB, Anypoint Platform,
RDBMS	:	MySQL
Web Services	:	SOAP, REST
Messaging Systems	:	AnypointMQ
Repository	:	GitHub
CICD	:	Jenkins
Build/Testing tools	:	Postman, SoapUI
Operating Systems	:	Windows

PROJECTS

PROJECT 1: INTELLECT DESIGN AERENA

Project Description:

Advice Search Engine is a web and mobile based platform that provides plans and recommendations as per client's wealth management. System also provides client recommendation score as per the advice data. Client can choose various plans and fund portfolios as per recommendations. System generates total illustration as per the client portfolios and sends data to EBS process.

Responsibilities:

- Designing and Publish Raml in Anypoint Platform
- Implementing various flows as per the requirements

- Worked on Experience, Process and System APIs as part of the integration
- Experience in writing Munit test cases for all the scenarios and increased code coverage up to 100
- Worked on Anypoint MQ integration as part of Advice set messages publish subscribe and Amazon S3 connector to transfer the documents
- Strong debugging and problem-solving skills with excellent understanding of system
- Following Sprint timelines and delivering the stories as per the business priority.
- Knowledge in deploying the mule API in On-premise and Cloud Hub
- Build and deploy the APIs in various environments and closely work with the ENV team for cloud platform infrastructure configurations
- Coordinating with Testing, Release Management and Prod support teams for any application issues
- Deploying the application through Bitbucket, Jenkins in Cloud Hub
- Implemented Error Handling using different exceptional strategies

PROJECT 2: PEARSON

Implemented data integration solution using SQL Stored Procedures to extract and consolidate product, price, and availability details from various regions within the OneCRM customer system. Enhanced data visibility and streamlined decision- making processes, resulting in improved efficiency and inventory management. Collaborated with cross-functional teams to address real-world challenges in a data-driven environment. Strengthened expertise in data integration, SQL development, and database management during successful project completion.

Responsibilities:

- Designed and developed entire application flows and corresponding Interfaces.
- Involved in full life cycle development of the project.
- Accessed various attributes, Payload and variables in and across Mule Message Flows to perform business operations like logging the error event.
- Implemented validation module for validating payload value.
- Prepared test cases performed unit testing and MUnit testing for mule flows.

- Accessed various attributes, Payload and variables in and across Mule Message
- Flows to perform business operations like logging the error event. Implemented validation module for validating payload value.
- Worked on REST APIs with HTTPS protocols.
- Created and tested Munit test cases
- Implemented Exceptional handling to handle the errors in the flows.
- Involved in API design sessions to decide various resources within each API. message schemas, message formats and authentication.

EXPERIENCE

OCT 2023 TO TILL DATE

MuleSoft Developer | CloudOM Technologies pvt ltd | Hyderabad

JAN 2021 TO AUG 2023

MuleSoft Developer | Concur web | Salem

SEPT 2020 TO DEC 2020

System admin | Concur web | Salem

2018 SEP TO JULY 2020

System Admin | NSI Solutions Pvt.Ltd. | Chennai

EDUCATION

B.Sc. Computers

PERSONAL INFORMATION

Date of Birth	:	17 Feb 1995
Nationality	:	Indian
Marital Status	:	Married
Languages known	:	Telugu, English, Tamil and Hindi

**Regards,
S Rajkumar**
