- Schedulers, HTTP into cloud Database after some transformations at the integration layer.

🎓 Education

BE/CSE   2015 – 2019
Sree Sastha Institute of Technology   chennai, India

📇 Certificates

MuleSoft Certified Developer - Level 1 (Mule 4)

🧠 Skills

Web Technologies (SOAP, REST) • **Tools Used** (Anypoint Studio, Anypoint platform)

Message Transformations (JSON, XML, CSV) • **Database** (Oracle)

CI/CD (Maven, GitHub and Jenkins)

🏠 Organizations

LTI Mindtree   10/2022 – 01/2024
Senior Software Developer   Bengaluru, India

Gama Tech Solutions Private Ltd   09/2019 – 10/2022
                                                                      Bengaluru, India

📂 Projects

Project # 1 : Product-spa-papi (Duration: 10-10-2022– present Day)
Providing special pricing agreement (SPA) Information based on the search criteria to SPI UI
microservice in terms of files in server and with business transformation. It can be leveraged
to find special agreement for the customer and product.
Implemented RAML files for different entity creations and respective associations and
created mule interfaces for efficient implementation of integration scenarios using various
connectors, filters, components, scopes and error handling with MuleSoft.
• Hands-on in exposed and consumed REST/SOAP web services in mule APIs implemented
data transformation using Data weave, routing, and data validation.
Involved in CI/CD jerkins pipeline deployment and created HTTP inbound & outbound flows,
• routing, orchestration and transformations.

Technical Skills: Jenkins, GitHub, Postman, Anypoint Studio, Anypoint Platform.

Project # 2 : Product-availability-papi (Duration: 01/06/2019 – 05/10/2022)
The objective of the project is to obtaining the availability of the multiple product materials
based on its ID and unit of measure and returns the availability of product such as product
name, sales unit of measure and additional product identifiers along with the current
available inventory.
Involved in UAT testing from MuleSoft end and performing performance testing internally
based on volumetric analysis.
• Creating and binding Queues with exchanges based on requests.
• Re-Triggering failed requests and running scheduler in a timely manner.
• Checking the CloudHub logs for proving request data to different teams as on when required.

Technical Skills: Anypoint Platform, Mule ESB, Jenkins, GitHub, Anypoint Studio.
