INTRODUCTION

A dependable and detail-oriented Senior Software Engineer with extensive experience in MuleSoft Development and architecture, looking to explore new challenging roles where I can add value to the organization.

EDUCATION

Bachelor Of Engineering - (Computer Science) Xavier Institute Of Engineering, Mumbai.

CERTIFICATIONS & TRAINING

- MuleSoft Certified Developer - Level 1
- MCD L2- Training , November 2022

AWARDS & RECOGNITIONS

- Raving Reviews Award - (2022 Q4, 2022 Q3, 2021 Q3)
- Apisero ACE Award - (2021 Q1, 2022 Q2, 2022 Q3)
- Star Performer Award - (2021 Q3)
- Kokua Award - (2021 Q3)

TECHNICAL SKILLS & KNOWLEDGE

Integration | API | Anypoint | Middleware | ESB | REST | SOAP | JSON | XML | RAML | Dataweave | DevOps | CloudHub | MUnit | CI/CD | Security | EDI | Monitoring |Error Handling| Salesforce | Amazon S3 | Google Cloud Platform (GCP)| MongoDB | MySql | Slack | Twilio | JDBC | HTTP | FTP | JMS | OAuth | OAuth 2.0 | SFTP | WebSocket | Banking | Migration | Loan processing | Marketo | AMQ | Stored procedure | Proxy | Wrapper APIs | OAS | Rate limiting | Security policies | Custom Policies | Technical Design Document | MuleSoft ESB | JAVA | Python | OAS3 | Swagger | GitHub | SOAP UI | Jmeter Testing | Flutter Mobile App Development | Maven | YAML | Git Actions | Anypoint MQ | AWS | Jitterbit | Workato

WORK EXPERIENCE

- **VYOM LABS PVT LTD**
  Senior Software Engineer (May 2024 - Present)
- **OPENLOGIX SOFTWARE SOLUTIONS PVT LTD**
  Senior Software Engineer (January 2023 - February 2024)
- **APISERO GLOBAL INTEGRATION SOLUTIONS PRIVATE LIMITED**
  Senior Software Engineer (September 2021 - December 2022)
  Software Engineer (July 2020 - August 2021)

PROJECTS

BayFirst Financial - Banking(Role - Lead Developer)
- Built Loan Processing and Communication APIs: Developed robust and scalable APIs for loan processing activities, ensuring high availability and reliability. Integrated with internal systems to streamline loan approval and disbursement processes.
- TWILIO Communication Channel Integration: Implemented TWILIO APIs to facilitate seamless communication between customers, banking staff, and third-party service providers. Enabled SMS and voice communication features for notifications, alerts, and customer support.
- Team Leadership and Collaboration: Led a team of developers, providing mentorship, guidance, and technical oversight. Collaborated with stakeholders to gather requirements, define project scope, and ensure alignment with business objectives.

Australian Computer Society - Migration Skills (Role - Lead Developer)
- Migration Assessment Application APIs: Designed and developed RESTful APIs to handle migration assessment applications, ensuring compliance with industry standards and regulatory requirements.
- Scalability and Performance Optimization: Implemented caching mechanisms and load balancing strategies to enhance system performance and scalability, accommodating a growing number of users and applications.
- Quality Assurance and Testing: Established robust testing frameworks and conducted comprehensive testing to ensure the reliability, security, and accuracy of APIs. Collaborated with QA teams to identify and resolve issues in a timely manner.

Indeed Job Portal - Japan Agency Team (Role - Lead Developer)
- Process Optimization and Automation: Identified bottlenecks in the existing onboarding process and implemented automation solutions to streamline operations. Leveraged workflow orchestration tools to automate repetitive tasks and improve efficiency.
- User Experience Enhancement: Conducted user research and feedback analysis to identify pain points and usability issues. Implemented user-centric design principles to enhance the overall onboarding experience for Japan agency partners.
- Continuous Improvement: Implemented monitoring and analytics tools to track key performance metrics and identify areas for improvement. Iteratively enhanced the onboarding process based on data-driven insights and user feedback.

PROJECTS

Playboy Enterprises INC. (Role: Senior Developer)
- Shipping Automation API Development: Developed robust APIs for automating shipping processes, ensuring accurate and timely handling of shipping-related tasks.
- Data Processing: Implemented functionality to read EDI files for Purchase Orders, enabling seamless data transfer and updating of the end system.

Clinical Education Options - DB to Salesforce Integration, Marketo to Stored Procedure, DB to Marketo Integration. (Role: Lead Developer)
- Integration Solutions: Led the implementation of integration solutions including DB to Salesforce, Marketo to Stored Procedure, and DB to Marketo integration.
- Technical Expertise: Utilized advanced messaging queues (AMQ) with user properties for retry use cases and implemented reverse stored procedures for enhanced database operations.

MDM-magma - SFTP to AWS S3 integration (Role: Senior Developer)
- SFTP to AWS S3 Integration: Took responsibility for integrating Jitterbit-based SFTP (Secure File Transfer Protocol) with AWS S3 (Simple Storage Service), ensuring secure and efficient data transfer.
- Technical Implementation: Implemented robust solutions to facilitate seamless data transfer between systems, leveraging cloud technologies and industry best practices.

Roche Pharma Solutions - Salesforce Ticketing System (Role: Senior Developer)
- Salesforce Ticketing System: Contributed as a senior developer in the development of a Jitterbit Salesforce-based ticketing system, ensuring effective management and resolution of customer inquiries and issues.
- Technical Implementation: Implemented functionalities to enhance ticketing processes and streamline customer support workflows.

Safe-Guard Products - Contract Services (TOYOTA/HYUNDAI/YAMAHA) (Role: Lead Developer)
- Wrapper APIs Development: Led the development of wrapper APIs for HYUNDAI, TOYOTA, and YAMAHA, facilitating seamless integration with third-party systems.
- API Specification: Implemented RAML and OAS 3 specifications for system APIs and process APIs, ensuring adherence to industry standards and interoperability.
- API Policy Configuration: Configured API manager to enforce security policies, rate limiting rules, and authentication mechanisms for accessing APIs. Implemented OAuth 2.0 authentication and JWT (JSON Web Token) validation to secure API endpoints.

Nextep POE Services (Role: Junior Developer)
- Service Automation: Played a key role in automating services offered by POE (Point of Entry), implementing functionalities to streamline processes and improve efficiency.
- Security Implementation: Applied rate limiting and security policies to ensure the integrity and security of services, safeguarding against potential threats and vulnerabilities.
